

THE MAYFIN PROJECT IS COMING TO AN END

LAST RESULTS & STEPS

Piloting Experiences

Over the past month, our partnership tested the project in Poland, Portugal, Spain, and Cyprus. The feedback was very positive—participants found the scenarios realistic, relevant to daily life, and engaging for financial learning. We sincerely thank all who took part for their time and contribution.

Last transnational project workshop in Florencia, Italy

On September 15–16, 2025, partners met in Florence to test the learning activities of the methodological guide and finalize the last details before the official launch of the MAYFIN products.

Multiplier Events

All partners held multiplier events during the project's final month. They were face-to-face and included at least 20 participants, representing both young, disadvantaged students and stakeholders such as youth workers, educators, teachers, NGOs, municipalities, and other local actors.

Exploitation phase

In this final phase, partners are working to ensure wide use of the project's validated tools. After testing them with young people, the focus is now on engaging key stakeholders to promote their adoption and lasting impact.
